

Natural Hazard Disclosure Report

Synthetic listing-document fixture

Natural Hazard Disclosure — synthetic template modeled on an NHD statement + report pair

Prepared for demonstration. SYNTHETIC DEMO DOCUMENT — fictional data for demonstration only. Not an official California Association of Realtors form.

Property address: 123 Main St, Pasadena, CA 91101

APN (Assessor's Parcel Number): 5842-018-024

Report date: 2026-09-14

Seller: Jane Seller

Report number: NHD-2026-0914-5842

Part 1 — Natural hazard disclosure statement

The seller and the parties preparing this statement answer each hazard question from the records and information then available. Do-not-know is a permitted answer where no reasonable basis for knowledge exists.

Hazard / zone question	Yes	No	Do not know
Is the property within an official earthquake fault zone?	X		
Is the property within a seismic hazard (liquefaction or landslide) zone?	X		
Is the property in a special flood hazard area on the FEMA map?		X	
Is the property within a state responsibility wildfire area?	X		
Is the property within a dam inundation zone?		X	
Is the property subject to any other disclosed natural hazard?		X	

Where the answer is Yes, the accompanying report describes the zone, its mapped boundaries, and where further records may be reviewed. Nothing in this statement is a prediction about whether a hazard event will occur.

Part 2 — Natural hazard disclosure report

Prepared by	Westline Hazard Reports (synthetic provider)
Report no. / date	NHD-2026-0914-5842 · 2026-09-14
Property	123 Main St, Pasadena, CA 91101 · APN 5842-018-024
Legal	Lot 24 of Block 7 of Elmwood Vista Tract, in the City of Pasadena, County of Los Angeles, State of California, per map recorded in Book 15, Page 82 of Maps, in the office of the County Recorder of said county.
Sources	State and federal mapping agencies; county records; local ordinances

Zone coverage summary

Zone or disclosure	Status	Reported by
Earthquake fault zone (Alquist-Priolo)	IN	State geological mapping
Seismic hazard (liquefaction / landslide)	IN	State hazard zones
Special flood hazard area (FEMA)	NOT IN	FIRM panel, current edition
State responsibility wildfire area	IN	State fire authority mapping
Dam inundation zone	NOT IN	State dam safety mapping
Local natural hazard disclosure ordinance	APPLIES	City of Pasadena

Zone statuses are internally consistent across this report: seismic zones are reported IN, the flood zone is reported NOT IN. Re-check against current maps before relying on any synthetic report in a real transaction.

Detailed zone statements**1. Earthquake fault zone — IN**

Mapped active faults pass within the reporting radius used for this address. Structures in an official fault zone may require a geological report before development approval, and buyers commonly review prior studies. See the mapped boundaries filed with the state geological survey.

2. Seismic hazard zones — IN

Liquefaction and landslide susceptibility mapping covers part or all of the parcel. Liquefaction potential relates to how saturated, loose soils behave during shaking; it does not mean damage will occur. Foundation assessments are a matter for licensed professionals.

3. Special flood hazard area — NOT IN

The parcel does not fall within a zone requiring mandatory flood insurance under the national flood insurance program, based on the map panel cited for this report. Flood insurance remains optional, and flood can occur outside mapped zones.

4. Wildfire — IN

Part of the reporting area lies in a state responsibility area for wildfire protection. Brush clearance, home-hardening, and defensible-space rules may apply, and insurers may apply underwriting criteria of their own.

5. Dam inundation — NOT IN

No mapped inundation boundary for a state-regulated dam covers this parcel on the sources consulted for this report.

6. Local disclosure ordinance — APPLIES

The city maintains its own natural hazard disclosure requirements; buyers should review the city's current disclosure handout at closing.

Sources and limitations

This report aggregates published mapping and records as of the report date. Zones change when maps are revised; private conditions (drainage, past slides, unrecorded activity) may not appear in any zone map. This is a synthetic report prepared for demonstration and is not a substitute for a report ordered from a licensed provider.
